Cin-Cin is rolling out a wine tasting event every month paired with tapas. We are kicking it off this July with South Africa. Did you know that South Africa is the ninth biggest producer of wines in the world? The South African wine industry has the potential for greatness. And we are fond of many of their wines. South Africa is a region offering wonderful values and lovely wines. This year, South Africans are celebrating the 350<sup>th</sup> anniversary of their wine industry and note proudly that it is generations older than any New World wines from Australia or South America.

Come taste for yourself and discover these delicious, value-priced wines. Cin-Cin will feature 7 wines from South Africa to pour for your tasting pleasure accompanied by tapas. Like what you taste? You can purchase a bottle to go (special pricing only available the day of tasting). Some of these wines are making their debut at this tasting and have not been showcased on our menu. Come in and experience these lovely values!

### Wines Featured (3 oz pours of each)
